PRE-EMPTIVE ACTIONS:

As part of our protection and commitment to the environment Yamba Marina provides all staff up-to date training on emergency response, risk assessment and infrasture assessment, loss monitoring for underground fuel storage, environment operations, and there is routine maintenance by fuel contractors. Onsite inspections wells are monitored on a monthly basis with all readings recorded.

The designated supervisor on-site (normally the Marina Manager) is responsible for investigating all reported hazards which are then documented and detailed for corrective action. Once the corrective actions have been taken, they will be documented and signed-off and filed.

All fire equipment is subject to six monthly external audits. All electrical equipment is subject to six monthly external audits. All fire and electrical equipment are checked by a senior staff member at least every 7 days for compliance.

All marine paint is stored in original tins and is locked in a separate stand-alone ventilated cabinet/container.

SAFETY EQUIPMENT:

Marine Spill kit available at top of ramp to fuel dock. Checked daily.

Clear signage on fuel dock details emergency response.

Marina fire hose reels to reach every marina berth.

Fire extinguishers in offices and on fuel dock.

Locked storage cabinets for flammable materials.

Storage and use of hazardous substances in accordance with the MSDS.

IN THE UNLIKELY EVENT OF A FUEL SPILL IT IS ANTICIPATED THE FOLLOWING ACTIONS WILL BE TAKEN:

1. Identify the source AND type of spill
2. Control leakage and slow or stop the leak at source
3. Control and/or divert leak
4. Notify Marina Management immediately
5. Notify appropriate authorities
6. Avoid disturbance and contact with leaked materials
7. Caution all people present of any danger or risk
8. Evacuate all non-essential people from the immediate area
9. Assess further likely dangers to nearby vessels or the marina structure
10. Once contained and it is safe to do so, record a full written record of what happened, the time it took place, what actions were taken, the people in attendance and the result of all actions.
11. The PIRMP is updated as required and in the event of an incident. In accordance with Part 5.7A of the Protection of the Environment Operations Act of 1997 the PIRMP is tested at least annually.

STAFF TRAINING AT YAMBA MARINA:

- ❖ At least one staff member on each shift is trained in First Aid.
- ❖ Regular training on-site for fire control and hazardous material handling.
- ❖ Emergency response training and emergency response drills.
- ❖ All staff and visitors to the site are made aware of site-specific emergency procedures and the location of the emergency assembly area.

MOST RECENT PIRMP TEST: 15th January 2025

The PIRMP is available on the Yamba Marina website: www.yambamarina.com.au
